FLEXBOX LAYOUTS
guided notes

FLEXBOX LAYOUTS

Which two flexbox properties help you to be able to build a multi-device layout?

flex
order

What are the 3 sub-properties that make up flex?

flex-grow
flex-shrink
flex-basis

What does the property "order" do? Give an example of a scenario where it would be very useful.

you can tell the screen which order to display items in a flexbox

ex. changing the location of a sidebar based on screen-sizr
